1918

Catalog and Price List of

Fruit and Ornamental TREES

Small Fruits, Shrubs, Roses, Bulbs, Etc.

We Pack Free

We Replace at Half Price

We Guarantee

Good Stock in Good Condition

We Pay Freight

A picture of Mr. Wilson's home in the semi-arid region of western Nebraska. This cozy little home is surrounded with trees and shrubs purchased from the North Bend Nurseries. If our trees and plants will grow in this dry country, surely people in the more favored sections of our state have no excuse for not beautifying their homes.

To Our Patrons and Friends

All sorts of produce, merchandise and stock have advanced in value 50 to 100 per cent, but our nursery stock remains at nearly the same old prices.

We take more than usual pleasure in presenting our catalogue to you for 1918. This is our largest issue of catalogues, which has been necessary on account of the increased number of customers.

We have tried to make our catalogue this year a great help to you in ordering your nursery stock. Our thirty-eight years of experience in handling and growing nursery stock in this section puts us in a position to know what varieties will succeed and those that will not. In compiling our catalogue we have listed only varieties of stock which will succeed in Nebraska and adjoining states.

You are perhaps approached each year with catalogues and agents from nurserymen all over the country, and in selecting stock grown by nurserymen not operating in this section you will, nine times out of ten, get stock that will not succeed. We do not list any of the untried novelties until we have thoroughly tried them in our ground.

To our customers we wish to express our appreciation for their valued orders in the past and hope we will have a continuance of same in the future; to those who have never bought stock from us we extend an invitation to send in your orders this year, giving us a chance of showing you the quality of stock we give our customers—it will make you a customer.

Send us the names and P. O. address of all persons who might wish to grow fruit, and we will send you by mail or add to your order Strawberry, Raspberry, Blackberry, Dewberry or Rose bushes and Shrubs, according to the value of your list. Be careful not to put in the names of those who cannot plant anything. Our price list is our agent. He will treat you well, so introduce him to your acquaintances.

With best wishes for your success, we are,

Yours very truly,

THE NORTH BEND NURSERIES.

Parcel Post

We pay the same rates charged for merchandise. We pack mailing trees and plants in the best moss, using wax paper next the roots and tough "Kraft" paper on the outside. Can send bundles of 20 lbs. or less, but they must not be more than 7 feet in length and circumference.

On large orders we will only charge the exact amount of postage required and will return all surplus postage.

Replacing—We will replace all fruit trees and plants that die from **any cause at half our retail price**. If we are to blame for the condition of the stock we will replace free.

Few firms are as liberal as we are about replacing. Most of the firms make no promise to replace.

Guarantee—We aim to have our stock true to name and carefully labeled; yet, while we exercise the greatest care to do this we will not be held responsible for any sum greater than the cost of the stock that proves untrue.

Varieties—As far as possible, leave the selection of varieties to us. We will use our experience with fruit in Nebraska for the past thirty-eight years for your benefit. Many select too many varieties, and often not the best sorts. When varieties become exhausted we reserve the right to substitute others of the same class and value or of larger size, except when orders are marked "No substitution."

A DESCRIPTIVE CATALOGUE will be furnished for ten cents. If an order is sent we will credit the amount on the order.

Directions for Planting will be sent to each one ordering.

Prices for 6 at a dozen rate, 5 at 10 rate, 50 at 100 rate, 500 at 1,000 rate, though several varieties in a class make up the number.

References—First National Bank, First State Bank of North Bend, or R. H. Haverfield, Datel & Datel, prominent merchants of North Bend.

Freight and Express Charges can be paid at destination, as our guarantee is accepted by railroad and express companies. Small bales of 50 pounds or less go as cheap by express as by freight, and when such is the case we send by express.

Owing to the fact that the prepayment of freight on some orders and not on others is inconvenient and tends to confusion and mistakes, we do not this year offer to prepay the freight, but offer a 10 per cent premium in stock on all orders. This 10 per cent premium usually exceeds the amount of the freight. We also allow you to make your own selection of stock for the premium and do not limit you to a few things which you may not care for.

Heeling in and Planting—When trees are received heel in immediately so that mellow earth comes in contact with all the roots, and water the roots if the earth is dry. Do not let the bale or box be exposed to sun or wind an hour if you can avoid it, and in planting do not let the roots get dry for a moment. In planting make a hole sufficiently large so roots will not be bent or twisted. It is a good plan to have roots grouted or dipped in mud before planting. Plant one or two inches deeper than the trees stood in the nursery. Pack the soil firmly about the roots, and after roots are covered add a bucket of water. When soaked away fill up the hole nearly even with the surface, but have the soil on top loose. Where water is plentiful fill up the hole partly with fine, loose surface soil and settle it about the roots with water instead of tamping it in. Cultivate with hoe or cultivator every ten days or oftener till middle of August. Nothing should be allowed to grow within two or three feet of the tree. Shorten in branches to one-half of last season's growth, and leave only four or five limbs on an apple tree.

In planting valuable trees a tube of wood or cement may be set in the hole six inches from the tree and to same depth the tree is planted. The roots of the tree can be more effectually watered through it with half the amount of water applied at the surface. The water usually applied at the surface seldom reaches as far as the roots.

Dynamite may be used very successfully for making holes for planting trees, especially where there is hardpan under the soil. The dynamite will loosen the hard soil to a depth of six to ten feet and trees planted there will grow rapidly and not suffer with drouth or surface water.

If you receive two or more catalogues, please pass the extras to neighbors or to friends who may need them.

Clubs—To those who send in other orders besides their own we will allow a commission of ten per cent, including an equal amount of the order of the person getting up the club.

PREMIUM

In addition to our 10 per cent premium to pay freight we offer an additional premium of 5 per cent on orders sent in with the cash before February 20, and 3 per cent before March 1, and such orders shall have **precedence in packing**.

If all orders could be sent before March 15th it would be better for the customer as well as the nurserymen.

Billings, Mont., September 25, 1917.

North Bend Nurseries,
North Bend, Nebraska.

Dear Mr. Stevenson:

As soon as the plants are in proper condition for planting, I would like some more of the Everbearing Strawberry plants.

The plants which you sent me, notwithstanding the extreme winter and the fact that my neighbor's horse rolled in the patch, have done extremely well. They have borne lots of berries and the vines are full of green berries and blossoms now. I would like to get the plants at the very earliest possible date.

Very truly yours,

M. E. H.

Delicious

Apples

Apple trees are scarce and dear in wholesale market, but we have our usual supply of apple and crab trees, and offer them at nearly former prices, which is very low for good trees.

Summer Apples

EARLY HARVEST.—Tree healthy, vigorous and a good bearer. Fruit medium size, nearly round, somewhat flattened; surface smooth, clear, waxy yellow, rarely blushed; flesh tender, juicy, acid to sub-acid; flavor good. July.

RED ASTRACHAN.—Tree vigorous, upright, hardy and productive. Fruit medium to large; surface smooth, marbled and striped on greenish yellow; flavor acid. July and August.

BENONI.—Medium; roundish; pale yellow, shaded with crimson; juicy, tender, sub-acid. August.

CAROLINA RED JUNE.—Tree a moderate, upright grower; an early and abundant bearer. Fruit small to medium, oblong, surface smooth, color dark red, with white ground; flesh white, very tender, fine grained, juicy, acid. July and August.

DUCHESS OF OLDENBURG.—A large, beautiful apple, roundish. Streaked red and yellow. Tender, juicy and pleasant. Tree a vigorous, fine grower and abundant bearer. Very hardy. August and September.

SWEET BOUGH.—Large, pale greenish yellow; tender and sweet; good bearer; moderate. July and August.

SWEET JUNE.—Tree is strong, upright, very productive. Fruit small to medium, round; greenish yellow; flesh white, fine grained, tender. July and August.

YELLOW TRANSPARENT.—A Russian apple. The tree is a hardy, upright grower; regular and early bearer, medium size. Color a rich, transparent yellow with a faint flush on sunny side; flesh melting, juicy, sub-acid. July and August.

LIVELAND RASPBERRY.—Very early, medium to large. Handsome color, red and yellow. Originated in Iowa. Hardy and very productive. See special prices. July and August. Price 3 cents extra.

Autumn Apples

MAIDEN BLUSH.—Medium; beautifully flushed with red; tender and pleasant; a fair grower; productive. August and September.

HAAS.—Medium to large, slightly conical and somewhat ribbed; pale greenish yellow, shaded and striped with red; flesh

Winesap

Autumn Apples—Cont'd.

fine white, sometimes stained, tender, juicy, sub-acid, good; bears early and abundantly; vigorous. September and October.

WOLF RIVER.—(Wisconsin.)—Very large, roundish, irregular, yellow covered with dark crimson, coarse grained, juicy. October-December.

WEALTHY.—(Minnesota)—Medium to large, roundish, oblate, striped bright crimson to dark solid red. A very attractive fruit, very juicy, sub-acid. September to November.

LONGFIELD.—(Russian)—Medium roundish, conical, light yellow with red blush, very juicy; sub-acid. October-December.

FAMEUSE OR SNOW.—Medium, roundish, flattened; deep, solid red, sometimes striped; juicy, fine grained; mild sub-acid. October-November.

PEERLESS.—(Minnesota)—Medium to large, roundish, conical, greenish, striped with dull red, firm; sub-acid. October-January.

Other varieties Pound Sweet, Ramsdell Sweet, Utters Red, etc.

Winter Apples

JONATHAN.—Medium size, yellow, nearly covered with red; a delicious dessert apple; always demands high market prices; vigorous and productive.

IOWA BLUSH.—Medium in size, roundish, conical, whitish with red cheek; quality fine, tart; tree vigorous and hardy on the prairies. November to January.

PATTEN'S GREENING.—A Duchess seedling from Northern Iowa. Tree very hardy and productive. Fruit full medium, olive green with some dull red stripes and splashes. Flavor pleasant, sprightly, sub-acid. A superior cooking fruit. December to February.

INGRAM.—A seedling of Janet. Tree more upright; fruit medium size, roundish, inclined to conical; smooth, yellow ground; striped, bright red, flesh greenish-yellow, delicate, tender, juicy, sub-acid. A late keeper.

GAÑO.—Fruit is bright red on yellow ground, with no stripes; large, oblong, surface smooth, polished; dots minute; basin shallow, sometimes deep; eye large, cavity deep; brown in color; stem medium to long; core medium. Tree healthy, vigorous and prolific bearer. January to April.

JENETTE.—Medium size; greenish yellow with red; excellent for all purposes; vigorous but slow grower. Very late.

BANANA.—Medium size; deep yellow; has delicate banana perfume; very popular.

BEN DAVIS.—Medium size; red striped; rather coarse grained, but great market variety; tree rarely fails to crop.

DELICIOUS.—Large, dark red; fine grained; a melting, delicious flavor; largely planted everywhere. 3 cents extra.

Winter Apples—Cont'd

McINTOSH.—Medium size large; nearly covered with crimson; crisp, tender; very popular; vigorous, annual bearer.

MISSOURI PIPPIN.—Large; mostly red; good quality; hardy; an early bearer; good keeper.

GRIMES' GOLDEN.—Tree upright and hardy, fruit full, color golden yellow when ripe, medium to large, quality sub-acid, mild and melting; valuable in any orchard. Early winter sort.

STAYMAN'S WINESAP.—Medium size; green and yellow; popular for all purposes; quick and vigorous grower.

TALMAN'S SWEET.—Medium size; pale yellow; sweet and juicy; vigorous and productive.

WINESAP.—Medium size; deep red; firm, crisp and juicy; popular everywhere; very productive and an early bearer.

YORK IMPERIAL.—Medium large; yellow, covered with bright red; a great variety for cold storage and market; tree vigorous.

MAMMOTH BLACK TWIG.—It is one of the most valuable and profitable apples grown. It resembles in every way the Winesap, of which it is no doubt a sport, except that it is one-third to one-half larger. The trees are also the same in habit of growth, color of bark and foliage, but the Black Twig is the stronger grower and makes a handsome tree in the nursery and orchard.

NORTHWESTERN GREENING.—Fruit medium to large, averaging from seven to eight ounces each and very uniform in size. Color greenish yellow, flesh juicy, firm and fine grained. Very fine quality

Jonathan

and flavor. Tree is very hardy and a thrifty grower, an early and continuous bearer. One of the longest keepers known. January to spring.

Other sorts are Salome, Windsor, Isham Sweet, Reagan's Red or Black Ben Davis. This is better quality than Ben Davis. Walbridge, a well known sort; Okabena and Malinda, hardy Minnesota sorts. King David is another popular sort. Will have to charge 3 cents extra for Liveland Raspberry, Delicious and Black Ben Davis, Okabena and Malinda. We have dropped Bismarck and some other sorts because they are so subject to blight.

Crab Apples

Same Price as Apple Trees.

They are entirely hardy, and do well in any kind of soil, in the most exposed situations.

They come into bearing very early, generally the second year, and bear every year.

They are unequalled for jelly, and can be dried, cooked, canned and preserved with the skin on, thus saving work.

FLORENCE.—Large, handsome; crimson, splashed with darker red; prolific, valuable, September.

GENERAL GRANT.—Large, roundish oblate; yellow, with stripes of deep red, and dark red, almost black on the sunny exposures; flesh white, moderately fine

grained, mild, sub-acid flavor. September and October.

HYSLOP.—Tree a moderate grower making a beautiful shaped, thrifty tree; bears young; fruit large, nearly round, flattened at the ends; skin smooth, color dark, rich red on yellow ground; flavor very good.

MARTHA.—This is one of the best. The ground is bright yellow, nearly overspread with light bright red. Of good size.

WHITNEY NO. 20.—Tree thrifty, upright grower; fruit large, skin smooth, striped and splashed with carmine; flesh firm, juicy, of pleasant flavor. One of the very best. August.

North Platte, Nebr.

Mr. J. W. Stevenson,
North Bend, Nebr.

Dear Sir: Will write to inform you I received the trees last Saturday in good condition. Am very much pleased with the trees and wish to thank you for the shrubbery. I remain, yours truly,

P. L. W.

Seckel Pears

Pears

Plant standard pears 20 feet apart and dwarf pears 10 feet. Cut out the leaders in standard sorts and thus compel them to form bushy tops.

3 to 4 ft., dwarf, 2 yrs., each by mail 2c more.....	.25	2.00	15.00
2 to 3 ft., dwarf, 2 yrs., each by mail 2c more.....	.15	1.40	12.00

✓ **BARTLETT.**—Large size with often a beautiful blush to the sun; buttery, very juicy and highly flavored; bears early and abundantly; very popular. August.

✓ **CLAPP'S FAVORITE.**—Very large, yellowish green to full yellow when ripe, marbled with dull red in the sun and covered with small russet specks, vinous, melting and rich; season August.

✓ **KIEFFER'S HYBRID.**—The pear was raised from seed from Chinese Sand Pear accidentally crossed with the Bartlett or some other kind grown near it; is an early and very prolific bearer; the fruit is of good quality, wonderfully showy, and is valuable for the table and market; it never rots at the core, and is as nearly blight proof as is possible for any pear to be. October.

✓ **"The Kieffer."** The reason there are not

many pears in the Middle West is because they do not plant Kieffers.

DUCHESS D'ANGOULEME.—Very large, dull greenish yellow streaked and spotted with russet, flesh white, buttery and very juicy, with rich and very excellent flavor, on the quince order, to which stock this variety seems well adapted; it is always fine; the large and fine appearance of this fruit makes it a great favorite. September.

SECKEL.—Small, skin rich yellowish brown when ripe, with a dull brownish red cheek, flesh very fine grained, sweet, is exceedingly juicy, melting, buttery; the richest, highest flavored pear known. August and September.

FLEMISH BEAUTY.—Is large, beautiful, juicy, melting, rich and fine; good bearer, is hardy everywhere. August and September.

Cherries

Budded on Mahaleb or Mazzard roots and will not sprout unless planted too deep. If planted too deep the tree will start roots near the surface and sprouts will start from them. The bud should be covered about two inches below the surface. Sweet or Heart Cherries do not succeed well, but will furnish them, if wanted, at the same price as the others. Would recommend Early Richmond, Montmorency, Dyehouse, Wragg, English Morello, Ostheim, Baldwin. They may be planted 16x16 feet.

	Each	10	100
5 to 6 feet, choice trees, first class.....	\$0.50	\$4.50	\$35.00

2 to 3 feet, trees, by mail, 2c more.....	.20	1.60	15.00

Varieties of Cherries

COMPASS.—Originated in Minnesota. Is a cross between the Morello Cherry and Miner Plum. Remarkably hardy and planted extensively in Minnesota and the Dakotas, where encouraging reports have been made as to hardiness and fruitfulness. Its early bearing is wonderful. One year old trees in the nursery row being covered with bloom. Many trees fruit same year they are planted. Unsurpassed in extremely cold climates for canning.

DYEHOUSE.— This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond; is of better quality and productive. Season June.

LARGE MONTMORENCY.—A fine large bright red cherry of the Richmond class but larger and more solid; a more upright grower, equally hardy and productive. Equal to Early Richmond in value. Ripens ten days later.

OSTHEIM.— Tree medium size, with round, compact top like English Morello bears early and abundantly. Fruit medium size; almost black when fully ripe; juicy, rich, almost sweet. For eating from the hand it is at the head of our list of hardy cherries. Season medium.

WRAGG.—Originated in Iowa. Medium to large in size, long stem, dark purple when fully ripe. A variety well adapted for the prairie regions of the Northwest. Appears identical in tree and fruit with English Morello, but is claimed to be a new variety. Valuable late cherry. July.

EARLY RICHMOND.—Everywhere the most popular. Tree strong, thrifty grower, making a large, symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season, June.

ENGLISH MORELLO.—Tree moderate grower, hardy; an early and great bearer; the most valuable of the late varieties. Fruit large, round; skin dark red, becoming nearly black when fully ripe; flesh dark red, tender, juicy and of a pleasant sub-acid flavor when fully ripe. July.

Early Richmond Cherries

The earliest of the tree fruits. Trees commence bearing young and bear yearly.

GOVERNOR WOOD.— Large, yellow shaded with light red, juicy, very delicious. A vigorous grower and very productive. Early Sweet.

BLACK TARTARIAN.— Large, juicy, rich, mild and sweet, vigorous and productive. Early.

BALDWIN CHERRY.—The tree is an upright grower, more inclined to be round than otherwise; a very rank, vigorous grower; fruit very large, almost perfectly round, very dark, yet almost transparent; flavor slightly sub-acid, yet the sweetest and richest of the Morello type. It is remarkable for earliness, vigor, hardiness, quality and productiveness.

DWARF ROCKY MOUNTAIN CHERRY—May be used as an ornamental bush and also for fruit. 3 to 4 ft. trees 25c, per 10 \$2.20; 2 to 3 ft. 20c, per 10 \$1.80.

Plums

In northern part of the state plant mostly of American varieties. They ripen up about the following order and are the leading sorts, though there are multitudes of other sorts: Milton and Wild Goose in July; Pottawattamie, Forest Garden, Wolf, Weaver, Hawkeye and Wyant in August; Stoddard, DeSoto, Miner and Surprise in September.

JAPANESE PLUMS—Abundance (early), Burbank.

These sorts are much larger, but not so good quality as European sorts.

EUROPEAN PLUMS—Lumbard, Tatge, Moore's Arctic, Green Gage, Shipper's Pride, German Prune, Bradshaw, Yellow Egg.

Plant ten or twelve feet apart in thicket form to insure fertilization. Plant several varieties together. Head back in the spring, thus keeping them close headed and stocky and preventing them from breaking down when loaded with fruit. By proper assortment you may have plums from July 15 to October 15.

Plums—Special

We have five varieties of Professor Hansen's best Hybrid Plums, a cross between American Hardy Native Plums and choice European sorts. They are good growers and very hardy. They bear second year after planting. We also have Theo. Williams' best Hybrid of an American sort and the Burbank, a very prolific sort and excellent quality. Mr. Williams, who lived near Omaha, originated a great many valuable sorts of plums, but this is his best, named Burwood.

These special sorts are becoming very popular. Do not fail to plant some of them. Our prices for them are low.

German Prune

European Plums

BRADSHAW.—Fruit very large; dark violet red; flesh yellowish green; juicy and pleasant; productive. Vigorous. Middle of August.

GERMAN PRUNE.—Very large, long; oval; purple, with a thick blue bloom; flesh green, firm, sweet, pleasant and separates freely from the stone. Tree bears enormous crops, hanging late; vigorous. September.

LOMBARD.—Tree vigorous, hardy and productive; fruit of medium size, roundish oval, slightly flattened at the ends; skin a delicate violet-red, paler in shade; flesh deep yellow, juicy and pleasant. August.

SHIPPER'S PRIDE.—Size large; color dark purple; flesh firm and excellent. September.

SHROPSHIRE DAMSON.—A plum of fine quality. The flesh is amber colored, juicy and sprightly. Very productive and a valuable market variety. Freestone. September.

TATGE, "King of All Plums."—The most productive, long lived plum known. This fine, hardy plum, of European strain, is from a seedling originated in Iowa. A fine grower and an early and profuse bearer. It has stood all the test winters of the past fifteen years and seems to be the most productive long lived plum known. Excellent in quality.

YELLOW EGG.—Very large; egg-shaped; excellent for cooking; good and productive; vigorous. Last of August. Splendid variety for nearby market.

Japan Plums

ABUNDANCE.—Large, roundish, freestone; amber, turning to rich cherry color with a whitish bloom; flesh light yellow, juicy, tender, sweet and excellent, vigorous and very productive. August.

BURBANK.—Large, nearly globular; clear cherry red with thin lilac bloom; flesh deep yellow; rich, very sweet, with a peculiar and agreeable flavor. Vigorous and a very early bearer. Last of August.

American Plums

STODDARD.—One of the largest of the native plums originated in Iowa. It is a light pinkish red color, very handsome, with a tough, sweet skin. Quality fair.

SURPRISE.—Grown from seed in Brown County, Minn., in 1886. Professor Crane-field, Madison, Wis., says: "The very best Plum so far tested in our orchard." Fruit prune-shaped, dark red. Long keeper, therefore valuable for market. Ripe from September 1 to 10. Tree a thrifty, upright grower; hardy and productive. A fine tree in orchard.

WEAVER.—Large, purple with a blue bloom, very prolific; a constant and regular bearer and of good quality. Tree very hardy. August.

WILD GOOSE.—The most popular fruit with some fruit growers. Tree a vigorous, upright grower; fruit medium to large, rich golden yellow, shaded with red; flesh yellow and juicy; flavor rich and good.

WOLF.—Fruit large, a perfect freestone. As to quality we find them superb for cooking and for serving with sugar as we use peaches. Tree a good grower; hardy. August.

WYANT.—Large, round, oblong, wedge shape, dark red; skin thick; peels readily; flesh firm; freestone, and of excellent quality. Native of Iowa and hardy.

FOREST GARDEN.—Large, roundish, oblong, deep red with yellow tinge, firm, sub-acid. August-September.

DE SOTO.—Large, oval, light yellow to red, sometimes mottled, juicy, good quality, an early and regular bearer, producing large crops. September.

Milton and Wild Goose are the earliest and ripen the last of July.

LARSON.—Originated by Mr. Larson of Washington County, Neb.; grown from seed brought from Denmark. Fruit very large; dull bluish red; handsome and of the best quality. Tree perfectly hardy; very productive. One of the best plums for Nebraska.

Peaches

Peaches are being extensively planted in Nebraska and have yielded good crops. The hardest sorts of budded peaches are much harder than seedlings. It is a very common mistake to suppose that seedlings of peach or apple are harder than selected budded or grafted sorts. The quality of the fruit of such seedlings is usually very poor. We recommend as best and hardest the following sorts, which ripen nearly in the order given here: Sneed, Alexander, Amsden, Hale's Early Triumph, season July; Champion, Crawford's Early, Bokara No. 3 (claimed to be the hardest peach known), season August. September sorts are Hill's Chili, Elberta, Crosby, Wright, Bailly, Beer's Smock. Clingstone sorts are Old Mixon Cling, Blood Cling, season September. The earliest sorts are clings. The Wright and Bailey are very hardy, but not as good quality as the others, and not ripe until last of September. Hardest sorts same price as others.

	Each	10	100
5 to 6 feet, budded sorts	\$0.25	\$2.20	\$18.00
4 to 5 feet, budded sorts20	1.80	15.00
3 to 4 feet, budded sorts, by mail 3c more.....	.15	1.20	10.00

Champion

ELBERTA. — Very large, tender and juicy; the greatest market variety.

CARMAN. — A new, hardy rot-proof peach, almost as large and fine as Elberta; skin pale yellow with blush on sunny side; flesh almost white, tender, melting, with rich, sweet, superior flavor. By far the finest early peach in cultivation. Ships well. August. (f.)

HALE'S EARLY. — Fruit Medium size; skin clear, smooth, white, delicately marbled with bright and dark red on the sunny side; flesh very melting, juicy and high flavored. July 10th to 20th.

CHAMPION. — Beyond doubt this is the champion early peach of America. Tree and fruit buds extremely hardy—has stood 18 degrees below zero and produced a full crop the following summer. Fruit often ten inches in circumference; quality A 1; a remarkably good shipper. August.

BOKARA. — The best of Prof. Budd's importations from Bokara; said to be the hardest peach grown. Large, fine quality, immensely productive. Last of August. (f.)

HEATH'S CLING. — Large, luscious but rather dry; tree hardy and productive.

CROSBY. — Medium size, orange; a good tree; very hardy.

CRAWFORD'S EARLY. — Large, yellow; very popular; vigorous and productive.

CRAWFORD'S LATE. — Large, yellow; flesh stained; very good; hardy and productive.

Apricots

Apricots are usually harder than peach trees, particularly the budded Russian sorts. Russian sorts: Alexander, Alexis, Gibb, J. L. Budd; season July 1 to August 1. Other sorts are Harris, Early Golden and Superb.

Downing Gooseberries

ST. REGIS EVERBEARING.—The "Early Till Late" Raspberry. Raspberries for four months! That's what you get when you plant St. Regis—the new everbearing variety. Moreover, they are not only raspberries, but raspberries of the very highest grade—in size, in brilliant crimson color, in firmness, in flavor. 10c each; 100 for \$3.00; 25 for \$1.00; 10 for 50c.

The St. Regis bore abundantly in 1915 till October 7. We can heartily recommend it. Prices reduced.

Lots of 10 can be mailed free of postage. 25 for \$1.25 postpaid.

If one-half of the plants grow, you can soon fill out vacancies with your own plants of the new growth.

Blackberries and Dewberries

Plant 3 to 7 feet. Pinch or cut new growth of Blackberries back when 2 feet high. Treat suckers of Blackberries and Red Raspberries between the rows as weeds and cut them off once or twice in the spring. We can furnish other sorts, but do not recommend them.

	10	100	1000
Snyder, hardest of all Blackberries; excellent quality.....	\$0.30	\$2.50	\$15.00
Stone's HaHrdy, very hardy, good bearer, good quality.....	.30	2.50	15.00

LUCRETIA DEWBERRY.—Largest and best of all Dewberries

The Lucretia Dewberry is becoming more popular every year. It stands drouth remarkably well. Cover plants during winter and be sure of a crop. We give strong roots.....

We drop the Loganberry and Strawberry-Raspberry from our list. It is a waste of

money and labor to try to grow them here.

Improved Dwarf Juneberries

The Juneberry is perfectly hardy, always bears, never needs to be replanted; fruit size of wild gooseberry, blue-black when fully ripe; a mild, rich, sub-acid, and is considered delicious by most people. It will do well in all parts of the state, and all should have it. It is a good ornamental bush.

	Each	10	100
18 to 24 inches, bearing size	\$0.12	\$1.00	\$8.00
10 to 18 inches10	.75	6.00

Can send small size by mail at 10 cents extra per 10.

Elderberries

A well known bush which bears a fine fruit for pies or wine or jelly. Price, 15c each; 10 for \$1.00.

Hazel Nuts and Filberts

Plants 2 to 3 feet, each, 10c; per 10, 80c; per 100, \$6.00. They grow nicely and soon increase. 10 by mail postpaid.

Asparagus

Plant in rich soil, 2 feet apart, in rows. Set roots 6 inches below the surface, covering with 3 inches of soil; fill in the first season while cultivating.

Conovers Colossal and Palmetto are the best sorts. 2-year-old, per dozen (by mail), 25c; per 100, \$1.00.

Rhubarb or Pie Plant

This deserves to be ranked among the best early vegetables in the garden. It affords the earliest material for pies and tarts, continues long in use, and is valuable for canning. Make the border very rich and deep.

	Each	10	100
Linneus, medium size, tender	\$0.10	\$0.80	\$6.00

1-year, No. 116	1.50	14.00
BETA. —Black, a cross between Concord and Minnesota wild grapes, equal to the wild grape for hardiness, quality fair;			
2-year20	1.80	16.00
1-year16	1.50	14.00

By mail any of the sorts, 15 cents extra per dozen for 1-year vines.
Write for prices on other sorts.

North Loup, Nebraska, May 16, 1917.

J. W. Stevenson,

North Bend, Nebraska.

Dear Sir: I want you to know we were more than pleased with the shrubbery we received from you a short time ago. We have it all in the ground and it is doing nicely. Last winter was the hardest on shrubbery of any we have in the years we have lived here.

Shall be pleased to do business with you next season.

W. G. R.

Strawberries

Dunlap

We have been growing strawberries since 1882. The past season has not been very favorable for strawberry growing. The blossoms are either perfect or imperfect. The imperfect are called pistillate, because destitute of stamens containing pollen, and have only pistils to receive the pollen from a staminate sort. The pistillate sorts will be marked (P) in our list, and such sorts need a staminate variety marked (S) near them or in a parallel row. Remember the staminate or fertile sorts will bear alone, but the pistillate sorts will not. We usually plant one row of staminate to two of pistillate.

PACKING AND SHIPPING.—We use great care, in packing, so that plants will reach destination in **first-class condition** and that **plants shall be true to name and carefully labeled**. If shipments are made late in the season and weather warm they should be expressed. Early in the season they may be shipped by freight. When plants are **bought near home** the express charges will be at least one dollar per thousand less than charges on shipments from the East, and risk of plants heating in transit is not half so great. By buying from us you get plants that do best in the West. Many of the Michigan and other Eastern sorts are worthless here, though recommended there. The grower who depends on Eastern recommendations will be disappointed in many varieties.

PARCEL POST.—We can send plants by mail postpaid that are bought at the **twenty-five cent rate**, but if a **hundred** is to be sent **add 10 cents for postage**, within 150 miles; 300 miles to 600 miles, 15 cents; over 600 miles, 20 cents.

When the plants are received dip the roots only in water or thin mud and lay them **loosely** in a cool cellar or heel them in in a shady place, spreading each bunch to occupy one or two feet of the drill, packing dirt firmly about the roots, but leaving tops uncovered. Water them often until ready to plant. If so treated they will be in better condition to replant than if planted on arrival if the weather is dry.

We charge **double price** for plants in **August and September**, or \$1 per 100 for standard sorts.

Our plants are dug fresh as ordered and not handled by two or more firms before you get them. We dig the whole row, thus getting the strong plants near the center of the row.

Plant in rows as wide apart as corn rows and have the plants about 15 inches apart in the row, requiring about 10,000 plants for an acre or 62 plants per square rod.

All Strawberries Listed We Have Tried and Know Them to Be Good

Brandywine

In planting have the crowns even with the pressed surface of the ground and press the soil firmly about the roots, which should not be bunched together in planting. Cultivate them every week. Tolerate no weeds. Pinch off all fruit stems first year. Do not allow rows to spread more than 18 to 24 inches wide, and cut all runners that reach beyond that limit. It is a great mistake to let them grow too thickly, like grass.

Spray your plants with Bordeaux to prevent rust.

To save your berries from late frosts turn the mulching over on the plants and blossoms till danger is past. After first crop of fruit is picked trim your rows down with plow or spade to ten inches and let runners start new plants on the edge of the plowed space. Cover with mulching from November 15th to December 1st, and rake off into space between rows when plants begin to grow in the spring. If for any cause you do not get a good stand of plants, write us as early as you know it, and we will help you out with more plants free of charge if we are to blame for poor condition of them, or will not charge more than half price. Can ship plants till the 20th of May. Lime dust made by slaking fresh lime with strong lye water and sifted on strawberry or vegetable plants when dew is on is an excellent remedy for insects and beneficial to the plant. A little flour added to the lime will make it stick a long time. Can add paris green if needed. We have more varieties than we are listing; only catalog those we have a surplus of.

Owing to the protracted drouth and delay in irrigating them we omit some sorts from our lists this year.

PRICES OF LEADING STANDARD SORTS

In giving the order for 1,000 or more, not less than 200 of a sort should be selected.

	25	100	1,000
BEDERWOOD (S). —Best early, rapid grower, very productive, good quality, one of the best sorts to pollenize early pistillate sorts, such as Warfield and Crescent	\$0.25	\$0.75	\$4.00
BRANDYWINE (S). —Berry large and handsome, good quality, productive, fine plant and grower, very thrifty, good pollinizer, few sorts so highly recommended, tender in drouth.....	.25	.75	5.00
DUNLAP (S). —At the experiment station in Illinois it was pronounced the best for three years among eighty-two other varieties. We have great confidence in this sort. It has a fine berry, is prolific, stands drouth, heat and cold, and transplants easily. There is danger of it matting together too thickly in the row. The leading sort now.....	.25	.75	4.00
GIBSON (S). —Recommended as one of the best varieties under cultivation; very productive of large berries. The Gibson is a strong, healthy plant30	.75	5.00
SAMPLE (P). —A late large sort; has always done well here. We recommend it30	.75	5.00
SPLENDID (S). —This variety is a great drouth resister. It is one of the hardest berries and produces a large crop of fine looking berries. It is one of the best pollenizers. Plant freely of this sort25	.75	4.00
WARFIELD No. 2 (P). —Early and late; very productive, good shipper, good quality; our leading sort; more extensively planted than any other sort, except Dunlap. We have not found any sort that will surpass the Warfield in productiveness or quality of fruit. It will not stand drouth as well as some other sorts25	.75	4.00

The Progressive

Everbearing Strawberries

PROGRESSIVE—Originated in 1908 by Harlow Rockhill of Iowa. The only plant retained out of 4,000 seedlings, and it certainly is a jewel. Plant much like Dunlap, strong, healthy and very hardy; good plant maker. Fruit good medium size, dark red inside and out; blossoms strongly staminate; every bloom makes a perfect berry; bloom and fruit well protected by the foliage, a most valuable feature, as it takes hard freezing to injure the fruit. Progressive is the most perpetual, giving good pickings for over three months in the fall when the weather is favorable. Progressive fruits alike on the new as well as old plants; nothing unusual to see bloom and berries on the new plants even before they take root. Progressive is enormously productive, berries firm, and very delicious. We regard Progressive as our most valuable Fall-bearing Strawberry. It has outyielded all other sorts for us this year. Some of our customers write us they have picked over one quart per plant from plants set last spring and more to be picked.

SUPERB (S).—Originated by Mr. Samuel Cooper of New York from whom we obtained our plants of this variety. The fruit is large, dark red, glossy, firm and of extra good quality. It is widely advertised by Michigan grower as best of all the everbearing sorts. We find that it is not equal to Progressive for productiveness the first year as Superb only bears fruit on the parent plant the first year while the other sorts also bear on the runner plants, which makes an important difference in the yield the first year. It is claimed they excel in yield the second year. Last spring the Superb yielded more fruit of superior quality than the common sorts.

The Progressive is our main sort; strong, healthy grower, free from rust and most prolific bearer of choice berries.

AMERICUS (S).—Raised by Mr. Rockhill of Iowa. Is a wonderful everbearing strawberry. It is strongly staminate, a strong grower, drouth resistant and grows from the extreme north to extreme south. Next to Progressive in productiveness. Berries medium size and of excellent flavor.

PEERLESS, ADVANCE and FORWARD are three new sorts we offer. We obtained them from Mr. Samuel Cooper of New York, who was the discoverer of the first everbearing strawberry in 1908. We paid \$5.00 per dozen for some of these new sorts, but consider them worth it. The three sorts are much alike in plant growth, size of berry and quality.

The berries are handsome and larger in size than other everbearing sorts. Are nearly equal to Progressive in productiveness. The plants are large, healthy and free from rust.

We cannot too highly recommend the everbearing strawberries to our customers. **No other sorts are needed for family use.** None of the common sorts have better roots or stand drouth better or will yield as much fruit.

One customer in Saunders County planted 100 plants May 1st. Carefully measured the berries he picked and found at the end of the season that he had gathered 125 quarts from 100 plants the same year he planted them and still had a good stand for a crop the next spring.

None of the standard June bearing sorts could near equal this yield. Sometimes a frost in May will ruin the whole crop of the common varieties, but while the earliest blossoms of the everbearers may be injured, there will be plenty more to follow and you are sure to have a crop of berries a week earlier than common sorts, and continued on through June.

Planting.—If planted in the garden, plant 1 by 3 feet. Pick off all fruit stems until August 1st, to allow the plant to become well rooted and established. Early runners may be planted by putting some soil on the joint where the leaf starts. One year plants, after bearing in June, should be treated the same as other sorts. Mow off the tops, narrow down the rows and cultivate between them. Would advise planting a new patch each year. Some of the Progressive plants set too many fruit stems and these should be thinned out. The dry season has made the crop of plants of all sorts very short, but we have not advanced our prices on everbearing plants.

Select Evergreens

Evergreens should be planted in the spring when sap is starting new growth. We handle transplanted trees, which are much safer to transplant than seedlings. Western grown evergreens succeed much better than Eastern trees, as our atmosphere has much less moisture than that of the East. Roots should not get dry for a moment on account of the resinous nature of the sap. Dip the roots in mud thick enough to adhere, and settle good soil about the roots with water. Leave surface about tree basin shape to hold water and mulching. Water thoroughly, but not too often, till November. The Black Hills Spruce and Ponderosa Pine, and the Colorado Evergreens are all succeeding well. The Jack Pine is doing remarkably well on the government reservations in this state. It transplants with very little loss. We recommend it for windbreaks instead of cedars. Scotch and Austrian Pines are excellent for windbreaks and stand drouth. White Pine transplants nicely, and is handsomest of the pines, but will not stand extreme drouth.

Jack Pine is not an ornamental tree.

Our Black Hills Spruce are as blue and handsome as the Colorado Blue Spruce,

TULIPS05	.50
NARCISSUS04	.40
JONQUILS03	.30
SNOW DROPS02	.20

Roses

Our Roses are all very strong two-year-old plants, and are not to be compared with the puny greenhouse plants from two-inch pots.

Write U. S. Department of Agriculture, Washington, D. C., for Farmer's Bulletin No. 750. It will give you a vast amount of information about Roses. It is free.

Hybrid Perpetuals

These are hybrids or crosses between June and Monthly roses, partaking of the hardiness of one parent and the perpetual blooming habit of the other. They are by far the most popular family of roses, needing good soil and culture, as they can only bloom on new shoots of the current season. Free manuring after the first crop will insure better blooms later in the season.

Hybrid Perpetual Roses

Price, strong two-year-old, 35c.

ALFRED COLOMB.—Bright carmine red; clear color; large, deeply built form; exceedingly fine.

ANNE DE DIESBACH (Glory of Paris)—Brilliant carmine pink. A superb garden sort; fragrant, one of the hardiest and best.

BARONNE DE BONSTETTIN.—Rich, dark red, passing to velvety maroon, highly fragrant; very double.

COQUETTE DES ALPS.—One of the finest pure white hybrid perpetuals; large, full, finely formed flower; pure white sometimes faintly tinged with pale blush; profuse bloomer.

COQUETTE DES BLANCHES.—Flowers of medium size in large clusters, full and slightly fragrant. Snowy white, sometimes delicately flushed with pale rose.

GENERAL JACQUEMINOT.—This might be called the rose for the million, for it is still a universal favorite. Bright crimson-scarlet, exceedingly rich and velvety.

GENERAL WASHINGTON.—Color brilliant crimson; very rich and beautiful; large, perfectly double and a free bloomer.

JOHN HOPPER.—Bright rose with a carmine center; large and full.

MADAM CHARLES WOOD.—Flowers large; dazzling crimson; a constant bloomer; very fine.

MADAM GABRIEL LUIZET.—Pink; very large and fragrant. As an exhibition rose it stands at the head of the list.

MAGNA CHARTA.—Bright, clear pink, flushed with violet crimson, flowers large, fine form, sweet, very double and free bloomer.

MRS. JOHN LAING.—Deep rose; large, fine form, fragrant, vigorous grower and hardy. One of the most profuse bloomers.

MARSHALL P. WILDER.—New; color cherry carmine; continues in bloom long after others are out of flower; exquisite.

PAUL NEYRON.—Deep rose color, good foliage and by far the largest variety in cultivation; one of the best.

MAD. PLANTIER.—Very double, pure white, extremely hardy.

AMERICAN BEAUTY.—One of the best and most valuable roses, both for garden and house culture. Color rosy crimson, exquisitely shaded and very handsome. Extra large, full flowers and fine buds. The plant is a constant bloomer. Each shoot produces a bud. The fragrance is delightful. Vigorous growth and has the ever-blooming qualities of the Tea Rose. Protect in the winter. Each, 40 cents.

FRAU KARL DRUSCHKE.—Or White American Beauty.—A pure paper white, free flowering, large size Hybrid Perpetual. It is a remarkably handsome plant with bright, heavy foliage and strong, upright growth. The bloom is perfect in form on fine, long stems, and of the purest possible white. There is nothing in the line of perfectly hardy roses that can compare with this one. 40 cents.

P. C. DEROHAN.—Dark crimson, changing to maroon.

ULRICH BRUNER.—Brilliant cherry crimson; very strong grower.

CLIO.—Flesh color, shading to rose in the center, large and fine form.

Climbing Roses

CRIMSON RAMBLER.—The famous crimson clustered climber, so extremely effective when grown on pillars and trellises. The plant is a vigorous grower, making shoots 8 to 10 feet long in a season. The foliage is large and glossy, the plant looks like a mass of double crimson flowers when in bloom. The panicles are large and remain perfect for several weeks. Perfectly hardy anywhere. Price 35 cents each.

YELLOW RAMBLER.—Flowers of medium size, in immense clusters, very sweet scented; a clear, decided yellow. The hardiest of all yellow climbing roses. It is a rampant grower, well established plants often making a growth of 10 to 12 feet in a season. 35 cents each.

WHITE RAMBLER.—Resembles Crimson Rambler in foliage and habit; flowers pure white. 35 cents each.

"BABY RAMBLER."—A dwarf (bush, not climbing) form of Crimson Rambler and, furthermore, ever-blooming. Will bloom continuously throughout the summer if planted out of doors. Has the same bright crimson color as the Climbing Rambler, and blooms in clusters of 20 to 40 flowers at one time on plants of fair size. "Baby Rambler" is one of the best red roses for bedding, and is going to be just as popular and as extensively planted as the climbing form has been. May be grown in pots. 2-year plants, 40 cents each.

Crimson Rambler

BALTIMORE BELLE.—Pale blush, is almost white; very double and fragrant, 30 cents each.

GREENVILLE, OR SEVEN SISTERS.—Purple crimson and pink, not quite hardy. 30 cents each.

QUEEN OF THE PRAIRIE.—Bright rose color; large and double; very vigorous and rapid in its growth; the best climbing rose. 30 cents each.

A Blue Rose

The Greatest Rose Novelty of the Century.

A New Rambler (Violet Blue)—Hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy and free blooming. 35 cents each.

5 New Ever-Blooming Crimson Rambler Rose

A sort of the well-known and famous Crimson Rambler climbing rose. This new rose produces its lovely flowers until killing frost stops further growth. 40 cents.

DOROTHY PERKINS.—Flowers in clusters of 25 to 30 of a beautiful shell-pink. A rapid climber. 35 cents.

WHITE DOROTHY PERKINS.—Same as above only the blossoms are white. 30 cents.

THOUSAND BEAUTY ROSE.—A new climbing rose, producing on the same bush so many different colored flowers that it is impossible to describe the variations, hence the very fitting name. Blooming profusely from beginning of June until last of July. Colors run from tender rose to bright rose and carmine with white and yellow tints showing; a strong grower and hardy. 35 cents.

Climbing Rose—Continued

EMPRESS OF CHINA.—The only strictly perpetual blooming climber now known. Extremely hardy; blooms early in the spring, and continues until the ground freezes solid. Very fragrant; beautiful form; especially valuable for buttonhole bouquets. Deep red in the bud, changing to pink and red, like an apple bloom; nearly double. 35 cents.

Moss Roses

The Moss Rose is as hardy as any rose can be, and an extra vigorous grower. They are much admired on account of their bright, healthy foliage and mossy-like covering of the buds. While they bloom but once a year, the flowers are large, beautiful and plentiful.

CAPT. JOHN INGRAM.—Dark, velvety purple, full and fine. 35 cents.

GLORY OF MOSSES.—Pale rose, very large, full and beautiful. 35 cents each.

PERPETUAL WHITE.—Pure white. It blooms in large clusters. 35 cents each.

Austrian Roses

This class flowers on extreme ends of wood of previous season's growth; very little pruning is therefore required.

HARRISON'S YELLOW.—Double, bright yellow; very showy and fine. 35 cents.

PERSIAN YELLOW.—Deep, bright yellow; small but handsome; double; a very early bloomer and much the finest hardy yellow rose. 35 cents each.

Rugosa Roses

ALBA.—A splendid white variety; highly scented. 35 cents.

CARMAN.—A hybrid obtained by crossing the pink Rugosa with Harrison's Yellow. Flowers the color of Gen. Jacqueminot and bloom in clusters, continuing nearly all summer. A strong grower, handsome foliage; hardy. 35 cents each.

RUBRA.—Bright rosy-crimson; flowers succeeded by red berries; a very handsome shrub. 35 cents.

Tree Roses

These are grafted on hardy rose stalks 4 to 5 feet high, are tree shaped and when in full bloom are objects of beauty, making handsome plants for the lawn, or as border plants along the sidewalk or driveway. They are coming into popular favor and at the low price we are offering them this year anyone can set out a few of these pretty tree roses in his yard or on the lawn.

CRIMSON RAMBLER TREE ROSE.—No other rose is so well adapted for growing in tree form. The branches droop gracefully and reach nearly down to the ground, thus forming a regular weeping tree. 75 cents each.

La France Roses

HYBRID PERPETUAL TREE ROSE.—These hardy and free blooming roses we have in tree form and can furnish the following colors: Red, White and Yellow. 75 cents each; 10 for \$6.50.

BABY RAMBLER TREE ROSE.—A most attractive novelty in hardy roses. Budded on strong, straight stems four feet high; the round, bushy, Baby Rambler tops at all times a perfect mass of crimson bloom. The most florescent and striking of all tree roses. 75 cents each.

Hybrid Wichurian Roses Price 35c

MANDA'S TRIUMPH.—The flowers are medium-sized, perfectly double to the center, pure white and very fragrant. The plant is an erect grower, has handsome dark green foliage, is entirely hardy and bears its lovely flowers in large clusters.

DUCHESS OF ALBANY, or RED LA FRANCE.—Large and full, highly perfumed, and of first quality in every respect. Flowers are produced in extraordinary profusion.

GRUSS AN TEPLITZ.—Large, rich scarlet, shading to velvety crimson; fragrant, and flowers in great abundance all summer. Valuable for bedding.

LA FRANCE.—Delicate silvery rose, shaded with cerise pink, often silvery pink with peach shading. Very large, double and superb form. Flowers continuously throughout the season. None can surpass the delicacy of its coloring; in fragrance, incomparable; in form perfect. Sweetest and most useful of all roses.

We can procure from greenhouse growers Bourbon, Noisette and Tea Roses for any who wish to grow such indoors or out. See our Descriptive Catalogue for description of many Ornamental Shrubs, Roses, Bulbs, etc., not listed here.

Formulas

Black knot on plums or cherries should be cut out and burned as soon as discovered.
For aphides or plant lice use kerosene emulsion on all plants.

BORDEAU MIXTURE

Copper Sulphate	6 pounds
Quicklime	4 pounds
Water	40 gallons

Dissolve the copper sulphate by putting it in a bag of coarse cloth and hanging this in a vessel holding at least 4 gallons, so that it is just covered by the water. Use an earthen or **wooden vessel**. Slake the lime in an equal amount of water. Then mix the two and add enough water to make 40 gallons. It is then ready for immediate use. For rots, moulds, mildews and all fungous diseases.

AMMONIACAL COPPER CARBONATE

Copper Carbonate	1 ounce
Ammonia.....enough to dissolve the copper	
Water	9 gallons

The copper carbonate is best dissolved in large bottles, where it will keep indefinitely, and it should be diluted with water as required. For same purposes as Bordeaux.

COPPER SULPHATE SOLUTION

Copper Sulphate	1 pound
Water	15 gallons

Dissolve the copper sulphate in the water, when it is ready for use. **This should never be applied to foliage, but must be used before the buds break.** For peaches and nectarines use 25 gallons of water. For fungous diseases.

PARIS GREEN

Paris Green	1 pound
Water	250 gallons

If this mixture is to be used on peach trees, 1 pound quicklime should be added. Repeated applications will injure most foliage, unless lime is added. Paris green and Bordeaux can be applied with perfect safety. The action of neither is weakened, and the Paris green loses all caustic properties. For insects which chew.

LONDON PURPLE

This is used in the same proportion as Paris green, but as it is more caustic it should be applied with the lime, or with the Bordeaux mixture. Do not use it on peach or plum trees. For insects which chew.

Fresh White Hellebore.....	1 ounce
Water	3 gallons

Apply when thoroughly mixed. For insects which chew.

Arsenate of Lead is used mostly for spraying trees. Two pounds to 50 gallons of water.

KEROSENE EMULSION

Hard Soap	½ pound
Boiling Water	1 gallon
Kerosene	2 gallons

Dissolve the soap in the water, add the kerosene, and churn with a pump for 5 to 10 minutes. Dilute 10 to 15 times before applying. For insects which suck, cabbage worms, and all insects which have soft bodies.

J. W. Stevenson,
North Bend, Neb.

Bartlett, Neb., April 25, 1917.

Dear Sir:

Your letter and the fruit trees and bushes duly received in good condition. I am inclosing 60c to cover half price on replace goods and postage. Many thanks for promptness and reliability. You did just as you said you would.

Yours very truly,

EDITH B.

Central City, Nebr.

Mr. Stevenson.

Dear Sir: The strawberry plants I ordered from you in March, arrived in good shape and nearly all lived and are growing fine. Very respectfully,

MRS. GEO. M.

J. W. Stevenson,
North Bend, Nebr.

Dodge, Nebr.

Dear Sir:—

I have received my trees and grapes in a fine condition. The trees were certainly better than expected. I am well pleased with your service. Will always give you my order when in need of anything from a nursery. Yours truly,

ANTON V.

Spraying Calendar

Although much has been written on the subject of spraying, the information is so scattered that it cannot readily be brought together. In the preparation of this calendar the most important points regarding sprays have been selected and arranged in such a manner that the grower can see at a glance what to apply, and when to make the applications. The more important insect and fungous enemies are also mentioned, so that a fairly clear understanding of the work can be obtained by examining the table below. When making applications advised, other enemies than those mentioned are also kept under control, for only the most serious ones could be named in so brief an outline. The directions given have been compiled from the latest results obtained by leading horticulturists and entomologists, and they may be followed with safety.

NOTICE.—The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If your crops are not troubled when some applications are advised, it is unnecessary to make any.

	1st Application.	2nd Application.	3rd Application.	4th Application.
Apples (Scab, Codding Moth, Bud Moth.)	Spray before buds start, using copper sulphate solution.	Just before blossoms open, bordeaux. For bud moth, arsenites when buds open.	Within a week after blossoms have fallen, bordeaux and arsenites.	Eight to 12 days later bordeaux.
Cabbage (Worms, Aphis.)	When worms first appear, kerosene emulsion.	Repeat in 7 to 10 days if plants are not heading.	If worms reappear, repeat if not heading.	After heads form use saltpeter for worms; a teaspoonful to a gallon of water.
Carnation (Rust and other fungous diseases, Red Spider.)	When rust is first noticed, Bordeaux. For Red Spider, kerosene emulsion.	For rust repeat first in 10 to 14 days. For Red Spider, repeat in 3 to 4 days.	Repeat second using ammoniacal carbonate of copper if plants are in bloom.	Repeat second if necessary.
Cherry (Rot, Aphis, Slug and Curculio.)	As buds are breaking, bordeaux. When aphis appear, kerosene emulsion.	When fruit has set, bordeaux. If slugs appear, dust leaves with air-slaked lime.	Ten to 14 days later, if signs of rot appear, bordeaux.	Ten to 14 days later ammoniacal copper carbonate.
Currant (Mildew, Worms.)	At first sight of worms, Paris green.	If worms reappear, repeat. If leaves mildew, bordeaux.	If worms still trouble, hellebore.	
Gooseberry (Mildew, Worms.)	When leaves expand, bordeaux. For worms, Paris green.	Ten to 14 days later repeat.	Ten to 14 days later, ammoniacal copper carbonate.	Repeat in 10 to 14 days if necessary.
Grape (Fungous diseases, Flea Beetle.)	Before buds burst, copper sulphate solution.	When leaves are half grown, bordeaux, Paris green for larvae of flea beetle.	As soon as fruit has set, bordeaux.	Ten to 14 days later, if any disease appears, bordeaux.
Nursery Stock (Fungous Diseases.)	For flea beetle, Paris green.	Repeat at intervals of 10 to 14 days.		
Peach, Apricot (Rot, Mildew.)	When buds appear, bordeaux.	As soon as fruit has set, bordeaux.	Ten to 12 days later repeat.	When fruit is nearly grown, ammoniacal copper carbonate.
Pears (Codding Moth Psylla, Leaf Blight, Scab.)	Before buds start, copper sulphate solution.	Just before blossoms open, bordeaux. Kerosene emulsion for psylla when leaves open.	After blossoms have fallen, bordeaux and arsenites.	Ten to 12 days later repeat if necessary.
Plum (Rot, Fungous Growths, Curculio.)	Before buds start, copper sulphate solution.	When fruit has set, bordeaux.	Ten to 12 days later repeat.	Ten to 23 days later bordeaux.
Potato (Beetles, Blight.)	When beetles first appear, arsenites.	When vines are 2-3 grown, bordeaux; arsenites for beetles if necessary.	Ten to 15 days later repeat if necessary.	Ten to 15 days bordeaux if necessary.
Quince (Leaf and Fruit Spot, Rot.)	Before buds break, copper sulphate solution.	When fruit has set, bordeaux and arsenites.	Ten to 12 days later, bordeaux.	Ten to 21 days later bordeaux.
Raspberry (Anthracnose, Rust.)	Mildew, keep heating pipes painted with equal parts lime and sulphur mixed with water to a paste.	When new canes are 1 foot high, bordeaux mixture.		During summer, if rust appears, bordeaux.
Rose (Mildew, Black Spot, Red Spider, Aphis.)	Just before blossoms open, bordeaux.	Black spot. spray plants once a week with weak copper sulphate.	Red Spider, kerosene emulsion to under side of foliage.	Aphis, kerosene emulsion.
Strawberry (Rust.)	At first appearance of rot or blight, bordeaux.	As first fruits are setting, bordeaux.	When first fruits are ripening ammoniacal copper carbonate.	When last of fruit is harvested, bordeaux.
Tomato (Rot, Blight.)		Repeat if diseases are not checked.		

Books

We will furnish any of the books in this list at prices annexed, postpaid:

Amateur Fruit Growing, 134 pages, cloth 50c, paper 25c.

Vegetable Gardening, 252 pages, cloth \$1.00, paper 50c.

Farm Wind Breaks and Shelter Belts, 69 pages, paper 25c.

The Gold Mine in Front Yard, a book about flowers, 280 pages, cloth \$1.00.

Evergreens and How to Grow Them, 100 pages, cloth 50c, paper 25c.

The Country Kitchen, a practical cook book, 154 pages, cloth 50c, paper 25c.

Poultry Manual, poultry culture in all its branches, 148 pages, cloth 50c, paper 25c.

Can furnish any other agricultural book you may want.

Write the Agricultural Department, Washington, D. C., Division of Publication, for list of Farmers' Bulletins. They are free for the asking.
For the Home Grower.

Special Bargain Lists

COLLECTION A. Bear early to late.

COLLECTION E.

100 Everbearing, two best sorts, 50 St. Regis Raspberry Everbearing Sort for \$3.00, express or mail paid. Save 50c and postage.

Collection K

This I call my **Home-Garden Collection**, and it should be planted by everyone who has a home to provide for and a piece of land at his disposal, whether it be in a city lot or a large farm. A plentiful supply of berries, fresh from the vines, will give more health and pleasure to the average family than can be bought in any other way at so small an outlay. Did you ever see a child, big or little, that did not love berries? Will your conscience allow you to continue to deprive them of this wholesome fruit? And, come to think of it, would you not enjoy yourself picking fresh, luscious berries from your own garden, which are not to be compared with the stale, moldy and bruised berries which you buy from the corner grocery? Plant Collection K; give it good attention, and you will never regret it. I will send varieties best suited to your locality and climate as follows:

100 Black Raspberry plants in two varieties.

200 Strawberry plants in four varieties. 50 of them Everbearing sorts.

50 Red Raspberry plants in two varieties.

and
Trees
Remember
Your
Wife With
A
LENOX
Flower Sprayer
They
Are Splendid

Remember your wife, she looks after the BACK-YARD GARDEN, the rose bushes and veranda plants; she needs one of these splendid sprayers. They are better than the common tin ones, spray reaches vines growing 8 to 10 feet high. JUST PRESS it a little more.

The cheapest and best of all hand sprayers. We don't believe in robbing the people under pretense of the European War. IT IS WICKED AND CRIMINAL. With an order for one, we will send wholesale price list to any one wishing the agency for his town.

THE LENOX SPRAYER MFG. CO.

157 West 23rd Street, New York.

Copy of State Entomologist's Certificate of Nursery Inspection

No. 21

This is to certify that on the 7th day of July, 1917, the growing stock and premises of the North Bend Nurseries, J. W. Stevenson, Proprietor, of North Bend, Nebraska, was inspected, and no San Jose scale was found nor indications that it had ever been present in the nursery or its vicinity, and the stock is apparently in a healthy condition and free from all other dangerous insect pests and fungous diseases.

LAWRENCE BRUNER, State Entomologist.

CLARENCE E. MICKEL, Deputy.

This certificate is good until July 1, 1918.

The North Bend Nurseries

Established 1882

J. W. STEVENSON, Proprietor

North Bend, Dodge County, Nebraska

DEAR FRIENDS AND PATRONS:

We have not had time to mail to our last Spring customers our usual circular letter inquiring after their success with the trees and plants purchased from us. We will be glad to hear from you when convenient for you. We have a fine lot of trees heeled in, safe from cold winter storms, and feel sure we can please you with good stock.

Yours very truly,

J. W. STEVENSON, Prop.
